Art Unit:

Restriction to one of the following inventions is required under 35 U.S.C. 129:

Group I, is drawn to a composition and method for photodynamic therapy using the compounds of formula I, classified in class 514, subclasses 184 and 185.

Group II, is drawn to a composition and method for photodynamic therapy using the compounds of formula II, classified in class 514, subclass 183.

The above delineated inventions are independent and patentably distinct each from the other. Each of the above groups is drawn to a different chemical structure. One practicing the invention of Group I, would not be required to practice the invention of group II. The search for the above inventions would not be co-extensive. Each of the above groups is capable of supporting its own patent. Therefore, restriction for examination purpose is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
